JEE(Main + Advanced) : NURTURE COURSE [PHASE : TOPS, I(A), I, I(B), II(A), II & LIVE-I, I(B), II(A)]

Time : 3 Hours

PAPER-2

Maximum Marks : 198

READ THE INSTRUCTIONS CAREFULLY

GENERAL :

1. This sealed booklet is your Question Paper. Do not break the seal till you are told to do so.
2. Use the Optical Response sheet (ORS) provided separately for answering the questions.
3. Blank spaces are provided within this booklet for rough work.
4. Write your name, form number and sign in the space provided on the back cover of this booklet.
5. After breaking the seal of the booklet, verify that the booklet contains **24** pages and that all the **18** questions in each subject and along with the options are legible. If not, contact the invigilator for replacement of the booklet.
6. You are allowed to take away the Question Paper at the end of the examination.

OPTICAL RESPONSE SHEET :

7. The ORS will be collected by the invigilator at the end of the examination.
8. Do not tamper with or mutilate the ORS. **Do not use the ORS for rough work.**
9. Write your name, form number and sign with pen in the space provided for this purpose on the ORS. **Do not write any of these details anywhere else on the ORS.** Darken the appropriate bubble under each digit of your form number.

DARKENING THE BUBBLES ON THE ORS :

10. Use a **BLACK BALL POINT PEN** to darken the bubbles on the ORS.
11. Darken the bubble  **COMPLETELY.**
12. The correct way of darkening a bubble is as : 
13. The ORS is machine-gradable. Ensure that the bubbles are darkened in the correct way.
14. Darken the bubbles **ONLY IF** you are sure of the answer. There is **NO WAY** to erase or "un-darken" a darkened bubble.
15. Take **$g = 10 \text{ m/s}^2$** unless otherwise stated.

QUESTION PAPER FORMAT :

16. The question paper has three parts : Physics, Chemistry and Mathematics.

Please see the last page of this booklet for rest of the instructions

DO NOT BREAK THE SEALS WITHOUT BEING INSTRUCTED TO DO SO BY THE INVIGILATOR

SOME USEFUL CONSTANTS

Atomic No. : H = 1, B = 5, C = 6, N = 7, O = 8, F = 9, Al = 13, P = 15, S = 16,
Cl = 17, Br = 35, Xe = 54, Ce = 58

Atomic masses : H = 1, Li = 7, B = 11, C = 12, N = 14, O = 16, F = 19, Na = 23, Mg = 24,
Al = 27, P = 31, S = 32, Cl = 35.5, Ca = 40, Fe = 56, Br = 80, I = 127,
Xe = 131, Ba = 137, Ce = 140, Cu = 63.5, Ne = 20, K = 39, Mn = 55

BEWARE OF NEGATIVE MARKING

PART-1 : PHYSICS

SECTION-I : (Maximum Marks: 24)

- This section contains **SIX (06)** questions.
- Each question has **FOUR** options. **ONE OR MORE THAN ONE** of these four option(s) is (are) correct answer(s).
- For each question, choose the option(s) corresponding to (all) the correct answer(s)
- Answer to each question will be evaluated according to the following marking scheme:

Full Marks : +4 If only (all) the correct option(s) is (are) chosen.

Partial Marks : +3 If all the four options are correct but ONLY three options are chosen.

Partial Marks : +2 If three or more options are correct but ONLY two options are chosen and both of which are correct.

Partial Marks : +1 If two or more options are correct but ONLY one option is chosen and it is a correct option.

Zero Marks : 0 If none of the options is chosen (i.e. the question is unanswered).

Negative Marks : -2 In all other cases.

- **For Example :** If first, third and fourth are the **ONLY** three correct options for a question with second option being an incorrect option; selecting only all the three correct options will result in +4 marks. Selecting only two of the three correct options (e.g. the first and fourth options), without selecting any incorrect option (second option in this case), will result in +2 marks. Selecting only one of the three correct options (either first or third or fourth option), without selecting any incorrect option (second option in this case), will result in +1 marks. Selecting any incorrect option(s) (second option in this case), with or without selection of any correct option(s) will result in -2 marks.

1. A container contains three liquids as shown in the figure. The specific gravity of liquid 1 and liquid 2 are 0.8 and 1.2 respectively. There are small holes at point P and M as shown in figure. Initially the holes are closed. The cross-section area of container is very large as compared to the area of the holes. Assume all liquids are ideal.

(A) The value of h_2 is $\frac{16}{5}h$

(B) The value of h_1 is $2.8h$

(C) If the hole is opened at P, the speed of water coming out from hole is $\sqrt{\frac{28}{5}gh}$

(D) If the hole is opened at M, the speed of liquid 2 coming out from hole is $\sqrt{\frac{32}{3}gh}$

2. A sphere is dropped into a viscous liquid of viscosity η from some height. If the density of material and liquid are ρ and σ respectively ($\rho > \sigma$) then which of the following is incorrect.
- (A) the acceleration of the sphere just after entering the liquid is $g \left(\frac{\rho - \sigma}{\rho} \right)$.
- (B) Time taken to attain terminal speed $t \propto \rho^0$.
- (C) At terminal speed, the viscous force is maximum.
- (D) At terminal speed, the net force acting on the sphere is zero.
3. A light cylindrical tube 'T' of length ℓ and radius 'r' containing air is inverted in water (density d). One end of the tube is open and the other is closed. A block 'B' of density $2d$ is kept on the tube as shown in the figure. the tube stays in equilibrium in the position shown. (Assume the atmospheric pressure is to be P_0). Pick up the correct statement(s). (Neglect mass of tube and mass of air enclosed).

- (A) the volume of block B is $\frac{\pi r^2 \ell}{3}$
- (B) the volume of block B is $\frac{2\pi r^2 \ell}{3}$
- (C) the pressure of air trapped in the tube is $P_0 + dg \left(h + \frac{\ell}{3} \right)$
- (D) the pressure of air trapped in the tube is $P_0 + dg \left(h + \frac{2\ell}{3} \right)$

Space for Rough Work

4. The figure shows the P-V plot of an ideal gas taken through a cycle DCBAD then :-

- (A) Maximum temperature will reach in the process $C \rightarrow B \rightarrow A$
 (B) Temperature at B is greater than temperature at A.
 (C) Heat flows out of the gas during $C \rightarrow B \rightarrow A$
 (D) The process during the path $C \rightarrow B \rightarrow A$ is isothermal
5. A metal rod is fixed in horizontal position and a force of magnitude F is applied as shown. If R_A = force by wall A and R_B = force by wall B, then -

- (A) $R_A = \frac{F}{2}$ (B) $R_B = \frac{3F}{2}$ (C) $R_A = \frac{3F}{4}$ (D) $R_B = \frac{F}{4}$
6. Two blocks of masses 2 kg each are moving in opposite direction with equal speed collides at $t = 5$ sec. The magnitude of relative velocity (v) is plotted against time ' t '. The loss in kinetic energy is K and coefficient of restitution is e , impulse exerted by one on another is J , then

- (A) $K = 8J$ (B) $J = 4 \text{ N-s}$ (C) $e = 0.5$ (D) $e = 0$

Space for Rough Work

SECTION-II : (Maximum Marks: 24)

- This section contains **SIX (06)** questions. The answer to each question is a **NUMERICAL VALUE**.
- For each question, enter the correct numerical value of the answer in the place designated to enter the answer. If the numerical value has more than two decimal places, **truncate/round-off** the value to **Two** decimal places; e.g. 6.25, 7.00, -0.33, -0.30, 30.27, -127.30, if answer is 11.36777..... then both 11.36 and 11.37 will be correct)
- Answer to each question will be evaluated according to the following marking scheme:

Full Marks : +4 If ONLY the correct numerical value is entered.

Zero Marks : 0 In all other cases.

1. The work done by gas in process ABCDEFGHA is $2NP_0V_0$. Find the value of N.

2. A brass rod is 69.5 cm long and an aluminum rod is 49.0 cm long when both rods are at an initial temperature of 0°C . The rods are placed in line with a gap of 1.5 cm between them. The distance between the far ends of the rods is maintained at 120.0 cm throughout. The temperature is raised by 300°C . The coefficients of linear expansion of brass and aluminum are $2.0 \times 10^{-5} \text{ K}^{-1}$ and $2.4 \times 10^{-5} \text{ K}^{-1}$ respectively. Finally the gap between the free ends (in cm) is

3. 2 kg ice at -20°C is mixed with 5 kg water at 20°C . Then final amount of water (in kg) in the mixture would be: Given : specific heat of ice = $0.5 \text{ cal/g } ^\circ\text{C}$, specific heat of water = $1 \text{ cal/g } ^\circ\text{C}$, latent heat of fusion of ice = 80 cal/gm

Space for Rough Work

4. Inner surface of a cylindrical shell of length ℓ and of material of thermal conductivity k is kept at constant temperature T_1 and outer surface of the cylinder is kept at constant temperature T_2 such that ($T_1 > T_2$) as shown in figure. Heat flows from inner surface to outer surface radially outward. Inner and outer radii of the shell are R and $2R$ respectively. Due to lack of space this cylinder has to be replaced by a smaller cylinder of length $\frac{\ell}{5}$, inner and outer radii $\frac{R}{2}$ and $\frac{R}{\sqrt{2}}$ respectively and thermal conductivity of material is nk . If rate of radial outward heat flow remains same for same temperatures of inner and outer surface i.e. T_1 and T_2 then find the value of n .

5. An impulse of $I = 30\text{N}\cdot\text{sec}$ is given at $t = 0$ to 3 kg block attached with 2 kg block with the help of spring in natural length. Initially the system is at rest and all surfaces are smooth. Find velocity of centre of mass at $t = 5\text{ sec}$?

6. Two masses $m_1 = 10\text{ kg}$ and $m_2 = 5\text{ kg}$ are connected by an ideal string as shown in the figure. The coefficient of friction between m_1 and the surface is $\mu = 0.2$. Assuming that the system is released from rest, Calculate the velocity in m/s when m_2 has descended by 4m .

Space for Rough Work

SECTION-III : (Maximum Marks: 18)

- This section contains **SIX (06)** questions.
- The answer to each question is a **SINGLE DIGIT INTEGER** ranging from 0 to 9, both inclusive.
- For each question, enter the correct integer value of the answer in the place designated to enter the answer.
- For each question, marks will be awarded in one of the following categories :

Full Marks : +3 If only the correct answer is given.

Zero Marks : 0 If no answer is given.

Negative Marks : -1 In all other cases

1. A circular wire, 0.08 m in diameter, with a slider wire on it, is in a horizontal plane. A liquid film is formed, bounded by the wires, on the left side of the slider, as shown. The surface tension of the liquid is $101 \times 10^{-3} \text{ N/m}$. An applied force F , perpendicular to the slider, maintains the film in equilibrium. Ignore the sag in the film. In figure, when the slider is 0.06 m from point P, the applied force is closest to $x \times 10^{-3} \text{ N}$. $\frac{x}{7}$ is equal to

2. P-V diagram of an ideal diatomic gas is a straight line passing through origin. The molar heat capacity of the gas in the process is xR . Find x .
3. Figure shows a hollow sphere kept on a rough incline with coefficient of friction $\frac{1}{3}$. The sphere is released from the position shown. Calculate the time taken (in sec) by the sphere to travel 27 m down the incline.

Space for Rough Work

4. A bullet of mass m moving with velocity $v_0(-\hat{k})$ strikes the bottom of a stationary vertical uniform ring of same mass m and radius $R = 1$ m. The ring lies in XY plane with its topmost point hinged on the ceiling. The ring can rotate about X -axis. There is no friction between the hinge and the ring. The bullet gets embedded in the ring immediately after collision. Find the angular velocity of the system (in radian /s) just after collision. [Take : $v_0 = 11$ m/s]

5. The ratio $\left(\frac{m_1}{m_2}\right)$ for which the massless rod remains horizontal is :-

6. In the shown arrangement all surfaces are smooth and system is released from rest. Mass of block A and B are equal ($m = 1$ kg), mass of block C is $M = 3$ kg. After releasing from rest block B strikes with the surfaces of C after travelling height $h = 10$ cm. Find the displacement (in cm) of the block C, just before, the B strikes to C.

Space for Rough Work

PART-2 : CHEMISTRY
SECTION-I : (Maximum Marks: 24)

- This section contains **SIX (06)** questions.
- Each question has **FOUR** options. **ONE OR MORE THAN ONE** of these four option(s) is (are) correct answer(s).
- For each question, choose the option(s) corresponding to (all) the correct answer(s)
- Answer to each question will be evaluated according to the following marking scheme:

Full Marks : +4 If only (all) the correct option(s) is (are) chosen.

Partial Marks : +3 If all the four options are correct but **ONLY** three options are chosen.

Partial Marks : +2 If three or more options are correct but **ONLY** two options are chosen and both of which are correct.

Partial Marks : +1 If two or more options are correct but **ONLY** one option is chosen and it is a correct option.

Zero Marks : 0 If none of the options is chosen (i.e. the question is unanswered).

Negative Marks : -2 In all other cases.

- **For Example** : If first, third and fourth are the **ONLY** three correct options for a question with second option being an incorrect option; selecting only all the three correct options will result in +4 marks. Selecting only two of the three correct options (e.g. the first and fourth options), without selecting any incorrect option (second option in this case), will result in +2 marks. Selecting only one of the three correct options (either first or third or fourth option), without selecting any incorrect option (second option in this case), will result in +1 marks. Selecting any incorrect option(s) (second option in this case), with or without selection of any correct option(s) will result in -2 marks.

1. 0.01 mol TNT was completely decomposed as :

The gases evolved occupied 2.24 ℓ at constant pressure and 273 K in the eudiometer.

- (A) Partial pressure of CO is 0.6 atm in the evolved gas
- (B) If just sufficient O₂ is introduced in the container to combust CO & H₂ completely then final volume of gases would be 1.68 ℓ at 1 atm & 273 K
- (C) If just sufficient O₂ is introduced in the container to combust CO & H₂ completely then final volume of gases would be 0.896 ℓ at 1 atm & 273 K
- (D) If after combustion of decomposition product, the mixture of gases at 273 K is passed through KOH(aq), contraction of 1.344 ℓ would take place

Space for Rough Work

2. Which of the following compound(s) can exist in meso form ?

3. Which of the following is/are correct matchings?

Space for Rough Work

4. Element "X" from second period has more "IE" than element "Y" from same period. "X" forms a series of compounds with "Y" such as X_2Y_3 , X_2Y_4 , X_2Y_5 , XY , XY_2 etc.
Y and X both have least electron affinity in their respective groups.
Which is/are correct regarding "X" and "Y"?
- (A) XY_3^- has X–Y bond order equal to S–O bond order in SO_3^{2-}
(B) $H_2X_2Y_2$ contains linkage between similar atoms
(C) XY & X_2Y has no effect on addition of conc. HCl or dil. HCl
(D) XY_2 is paramagnetic
5. The specie(s) that has/have maximum value of $\frac{\sigma - \text{bond}}{\text{Lone pairs}}$ among the following is/are.
(A) SO_2 (B) SO_3 (C) XeO_4 (D) ClO_4^-
6. A 1kg real gas is liquified at temperature 300K as shown in diagram. Select the correct statement-

- (A) 2 atm is vapour pressure of liquid at 300 K
(B) Density of gas when V equals to 10 litre, is 0.1 gm / ml
(C) Density of gas when V equals to 10 litre, is 0.05 gm / ml
(D) Density of liquid when V equals to 10 litre, is 1 gm / ml

Space for Rough Work

SECTION-II : (Maximum Marks: 24)

- This section contains **SIX (06)** questions. The answer to each question is a **NUMERICAL VALUE**.
- For each question, enter the correct numerical value of the answer in the place designated to enter the answer. If the numerical value has more than two decimal places, **truncate/round-off** the value to **Two** decimal places; e.g. 6.25, 7.00, -0.33, -.30, 30.27, -127.30, if answer is 11.36777..... then both 11.36 and 11.37 will be correct)
- Answer to each question will be evaluated according to the following marking scheme:

Full Marks : +4 If ONLY the correct numerical value is entered.

Zero Marks : 0 In all other cases.

-
1. A sample of H-atoms contains large number of atoms in two different excited states n_1 & n_2 only. These atoms make transition to ground state. If the energy of spectral line obtained due to transition of electron from n_2 to n_1 is 2.55 eV then calculate the maximum no. of different lines obtained in spectrum.
 2. The dissociation equilibrium of a gas AB_2 can be represented as $2AB_2(g) \rightleftharpoons 2AB(g) + B_2(g)$ The degree of dissociation is α and it is small compared to 1. The expression relating the degree of dissociation (α) with equilibrium constant K_p and total pressure P is $(2K_p/P)^{\frac{1}{x}}$. Then x will be :
 3. How many number of Aldehyde possible for $C_5H_{10}O$? (Only structural)
-

Space for Rough Work

4. How many compound(s) release CO_2 with NaHCO_3

5. If x = number of species that are polar among , , H_3PO_4 , CCl_4 , , P_4O_7

y = Maximum number of electrons that have identical value of effective nuclear charge in "Cu".

The value of $\frac{y}{x}$ is _____.

6. If covalent bond length of A_2 molecule is $2\text{\AA}$ and covalent bond length of B_2 molecule is $1\text{\AA}$ and percentage covalent character in A-B bond is 80.5% then covalent bond length of A-B bond is (in $\text{\AA}$).

SECTION-III : (Maximum Marks: 18)

- This section contains **SIX (06)** questions.
- The answer to each question is a **SINGLE DIGIT INTEGER** ranging from 0 to 9, both inclusive.
- For each question, enter the correct integer value of the answer in the place designated to enter the answer.
- For each question, marks will be awarded in one of the following categories :

Full Marks : +3 If only the correct answer is given.

Zero Marks : 0 If no answer is given.

Negative Marks : -1 In all other cases

-
1. An organic compound contains carbon, hydrogen and nitrogen. If weight ratio of C, H, N (in same order) is 9 : 1 : 3.5 and molar mass of compound is 216 gm/mole and number of atoms present in 1 molecule of compound are x then calculate value of $\frac{x}{4}$.
 2. 50 ml of '20V' H_2O_2 is mixed with 200 ml, '10V' H_2O_2 and the mixture is diluted to 1.0 L. The volume strength of resulting solution is
 3. Total number of cyclic structure isomers possible with MF C_5H_{10} :
-

Space for Rough Work

4. Identify total number of stereo isomers for following compound which are optically inactive.

5. Number of specie(s) that share atleast one oxygen atom per tetrahedral unit among the following.
 P_4O_{10} , $[Na_2Fe_3Fe_2Si_8O_{22}(OH)_2]$, $Ca_5Si_5O_{15}$, $H_2S_2O_7$, $Si_2O_7^{6-}$, $K_2Cr_2O_7$, Borax
6. The number of degenerate orbitals in absence of external magnetic field & electric field in third excitation state of Be^{3+} is "x" times the degeneracy value in 1st excited state of He^+ . "x" is _____.

Space for Rough Work

PART-3 : MATHEMATICS
SECTION-I : (Maximum Marks: 24)

- This section contains **SIX (06)** questions.
- Each question has **FOUR** options. **ONE OR MORE THAN ONE** of these four option(s) is (are) correct answer(s).
- For each question, choose the option(s) corresponding to (all) the correct answer(s)
- Answer to each question will be evaluated according to the following marking scheme:

Full Marks : +4 If only (all) the correct option(s) is (are) chosen.

Partial Marks : +3 If all the four options are correct but **ONLY** three options are chosen.

Partial Marks : +2 If three or more options are correct but **ONLY** two options are chosen and both of which are correct.

Partial Marks : +1 If two or more options are correct but **ONLY** one option is chosen and it is a correct option.

Zero Marks : 0 If none of the options is chosen (i.e. the question is unanswered).

Negative Marks : -2 In all other cases.

- **For Example :** If first, third and fourth are the **ONLY** three correct options for a question with second option being an incorrect option; selecting only all the three correct options will result in +4 marks. Selecting only two of the three correct options (e.g. the first and fourth options), without selecting any incorrect option (second option in this case), will result in +2 marks. Selecting only one of the three correct options (either first or third or fourth option), without selecting any incorrect option (second option in this case), will result in +1 marks. Selecting any incorrect option(s) (second option in this case), with or without selection of any correct option(s) will result in -2 marks.

1. $\frac{C_0}{1} + \frac{C_1}{2} + \frac{C_2}{3} + \dots + \frac{C_{10}}{11}$ is equal to (here $C_r = {}^{10}C_r$)
 (A) $\frac{2^{11}}{11}$ (B) $\frac{2^{11} - 1}{11}$ (C) $\frac{3^{11}}{11}$ (D) $\frac{3^{11} - 1}{11}$
2. If the range of the expression $\frac{x^2 + 2x - 11}{x - 3}$ for real values of x is $(-\infty, a] \cup [b, \infty)$ then which of the following is/are true -
 (A) $\sqrt{a^2 + b^2} = 13$ (B) $\sqrt{a + b} = a$
 (C) a and b are coprime numbers (D) $\log_{b-a}(b+a) = \frac{a^2}{b}$

Space for Rough Work

3. For the hyperbola $16x^2 - 25y^2 - 32x + 50y - 409 = 0$ which is/are true -
- (A) foci are $(\sqrt{41} + 1, 1)$ and $(-\sqrt{41} + 1, 1)$
- (B) eccentricity is $\frac{\sqrt{41}}{5}$
- (C) one of the directrix is $x = \frac{-25}{\sqrt{41}} + 1$
- (D) length of latusrectum = $\frac{16}{5}$
4. The number of ways in which 8 candidates $A_1, A_2, A_3, \dots, A_8$ can be ranked such that A_3 always comes before A_4 and A_4 always comes before A_5 , is λ , then λ is less than -
- (A) $2 \times {}^8P_6$ (B) $\frac{8!}{6}$
- (C) $8!$ (D) $\frac{8!}{3}$
5. The value of ${}^nC_1 \sum_{r=0}^1 {}^1C_r + {}^nC_2 \left(\sum_{r=0}^2 {}^2C_r \right) + {}^nC_3 \left(\sum_{r=0}^3 {}^3C_r \right) + \dots + {}^nC_n \left(\sum_{r=0}^n {}^nC_r \right)$ is equal to ($n \in \mathbb{N}$)
- (A) 2^n (B) 3^n (C) $(3^n - 1)$ (D) $(3^n + 1)$
6. If $3 \sec \theta + 2 \sec \frac{\pi}{4} = 2 \cos \theta$, where $\theta \in (0, 2\pi)$, then which of the following can be correct ?
- (A) $\cos 2\theta = 0$ (B) $\sin 2\theta = 1$ (C) $\tan \theta = 1$ (D) $\tan \theta = -1$

Space for Rough Work

SECTION-II : (Maximum Marks: 24)

- This section contains **SIX (06)** questions. The answer to each question is a **NUMERICAL VALUE**.
- For each question, enter the correct numerical value of the answer in the place designated to enter the answer. If the numerical value has more than two decimal places, **truncate/round-off** the value to **Two** decimal places; e.g. 6.25, 7.00, -0.33, -.30, 30.27, -127.30, if answer is 11.36777..... then both 11.36 and 11.37 will be correct)
- Answer to each question will be evaluated according to the following marking scheme:

Full Marks : +4 If ONLY the correct numerical value is entered.

Zero Marks : 0 In all other cases.

1. Number of ways in which a particle can reach from A to B by shortest path on grid is -

(Assume all the steps to be vertical or horizontal and are of equal length)

2. Least positive integral value of x such that $\frac{x^2 + 4x + 4}{2x^2 - x - 1} > 0$, is :-
3. If A, G, H are the arithmetic, geometric and harmonic means of two positive real numbers & if $A = 3H$, then $\frac{A^2}{G^2}$ is equal to

Space for Rough Work

4. If $\left(\sum_{r=0}^{18} (r+1)!(r^2 + 4(r+1)) \right) + 2 = k!$, then the value of k is ($k \in \mathbb{N}$)
5. The value of $\frac{1}{\log_a abc} - \log_a abc + \frac{1}{\log_{bc} abc} + \frac{1}{\log_{bc} a}$ is equal to
6. If line $2y - 4x - 3 = 0$ is tangent to $y^2 = 8ax$ $\{a > 0\}$, then length of latus rectum of the parabola is
-
